PROFESSIONAL SUMMARY

B.Tech Computer Engineering student (2027) delivering production-grade applications across three domains: Full-Stack Web Development (React/Next.js/Node.js), Java Engineering (OOP, Collections), and Salesforce CRM Administration. Proven ability to architect, build, and ship end-to-end systems independently — from REST APIs and SSR platforms to relational database design. Eager to contribute real skills in a challenging internship.

TECHNICAL SKILLS — THREE TRACKS

Web Development

- JavaScript ES6+
- React & Next.js
- Node.js & Express
- HTML5 / CSS3 / Bootstrap
- REST APIs & JWT Auth
- MongoDB & MySQL
- Server-Side Rendering

Java Engineering

- OOP Principles
- Collections Framework
- Exception Handling
- Modular Design
- Console App Development
- Data Structures
- Clean Code Practices

Salesforce CRM

- Admin Fundamentals
- Objects & Field Config
- Validation Rules
- Reports & Dashboards
- User & Profile Mgmt
- SOQL Basics
- Trailhead Learner

PROJECTS

CrazyXAni — Anime Streaming Platform 2024

Stack: *Next.js, React, Node.js, MongoDB, Anilist API*

- Built a full-stack SSR platform aggregating anime data from Anilist API with search & streaming.
- Implemented watchlist feature with MongoDB persistence and optimized for SEO using Next.js.
- Designed RESTful backend services handling real-time API calls and user session management.

Inventory Management REST API 2024

Stack: *Node.js, Express, MySQL, JWT, Postman*

- Architected secure REST API with full CRUD operations and JWT-based role authentication.
- Designed normalized MySQL schema; tested all endpoints thoroughly using Postman collections.

Java OOP Console Application 2024

Stack: *Java, OOP, Collections, Exception Handling*

- Implemented core OOP concepts — encapsulation, inheritance, polymorphism — in a clean Java app.
- Used ArrayList, HashMap and robust exception handling for reliable, maintainable code.

EDUCATION

B.Tech — Computer Engineering

CET, NMK City, Jalgaon, MH

2023 – 2027 (Expected)

DSA · DBMS · OS · Networks · OOP · Web Dev

DEV TOOLS

VCS: Git · GitHub
API: Postman · REST · JWT
Infra: Docker · VS Code
DB: MySQL · MongoDB

INTERESTS
