PROJECTS

Krushu Mitra — AI-Powered Farmer Assistance App

Stack: Flutter · Firebase · Riverpod · SQLite · Gemini API · Claude API

- Built an 11-feature production app — AI Crop Doctor (Gemini Vision), trilingual chatbot (Hindi/Marathi/English), live mandi prices, soil advisor, govt. scheme checker, crop calendar, and farm diary — competing at the FAR AWAY 2026 International Hackathon as B.Tech final-year project.
- Engineered an offline-first architecture (Firestore + SQLite sync), a 5-key Gemini load balancer with Claude API fallback for reliable AI inference, and Firebase OTP authentication.

CrazyXAni — Full-Stack Anime Streaming Platform

Stack: Next.js · React · Node.js · MongoDB · JWT

Inventory Management REST API

Stack: Node.js · Express.js · MySQL · JWT · Postman

- Developed a secure full-CRUD REST API with role-based JWT authentication and a normalised MySQL schema; validated all endpoints via Postman.
